## IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of : Evan F. Weis et al  
Application No. : 10/092,158  
For : **Defining Force Sensations Associated with Graphical Images**  
Filed : March 5, 2002  
Examiner : Christopher D. Biagini  
Art Unit : 2442  
Confirmation No. : 1658

INTERVIEW AGENDA

Examiner Biagini:

Here is the proposed agenda for our interview scheduled for 1pm on Wednesday, June 22, 2011 at the United States Patent and Trademark Office

- I. Discuss the Barrett reference's alleged teaching of an embedded force feedback command.

Specifically, Applicant would like to discuss the Examiner's allegations with respect to a web page file size being a command as well as the Examiner's evidentiary support for the same (i.e. a command as "a signal that actuates a device (as a computer)"). Applicant would like to understand why the Office Action does not allege that the web page file size is a signal that actuates a device, but rather states that the web page file size is a signal that results in the production of force feedback.

If you have any questions or comments, please contact me at your convenience.
